

## LARGEST LOCAL LAW FIRM CHANGES THE CONCEPT OF CHEAP TRAVEL

Largest law firm in Montgomery County, MD has seen their return on investment ten-fold as they decide to take the plunge into the Audio/Visual world.

**Montgomery County, MD - August 18, 2009:** The largest law firm in Montgomery County, MD, Shulman, Rogers, Gandal, Pordy & Ecker Law Firm (Shulman, Rogers), decides to revamp their travel and telephony budget to save time and money by utilizing a Unified Communication Platform System after their move to the new Potomac building in Potomac, MD.

In April, 2009, Shulman, Rogers sends out the Request for Information to more than five different turn-key technology companies. The project is awarded to MCW Solutions, LLC, a local technology integrator specializing in the convergence of facilities and Information Technology Solutions.

**Shulman, Rogers' Partner, David Pordy comments, "We are more than pleased with MCW's level of professionalism and level of execution."**

MCW Solutions designs an innovative Unified Communications Platform for Shulman, Rogers. This Platform solution gives the law firm the capability to unite all of their telephony and Audio/Visual systems releasing a majority of their budget constraint due to travel. The Platform is comprised of an Audio/Visual design for Shulman, Rogers' five conference rooms including: a fully automated three-conference room solution, along with two other remote conference rooms for presentation purposes. The main of the three-conference room solution is divided by sky fold doors, controlled by AMX Netlinx controller that controls the lighting, sky fold doors, projectors, plasmas, and different electronic sources such as: cables, speakers, DVD and hardware. MCW also implemented a new phone system and a LAN infrastructure.

###

MCW Solutions, LLC was founded in 2003 to meet the demand for a single integrator to provide turnkey systems in support of Telecom, Security and Audio/Video applications. MCW's methodology starts at the physical layer on the technology stack with telecommunications wiring and moves through all phases including the transportation and application layers providing Security, Access Control, Closed Circuit Television, Pro-Audio/Visual Systems, and IT support.
