

FOR IMMEDIATE RELEASE

Ashburn, Virginia – August 2011 – MCW Solutions, an Ashburn, VA based technology integration firm specializing in Audio/Visual, Security, Structure Wiring, and IT Services acquires Texel, a Reston based firm with thirty plus years serving the Mid-Atlantic area with structure wiring sales and implementation services.

This acquisition represents the second strategic corporate purchase for MCW and further strengthens the MCW value proposition for its clientele.

MCW's management team carefully analyzed the region for a premier structure wiring firm and recognized Texel as having all the prerequisites; a strong installed base, long history of stellar past performance, valuable certifications and dedicated employees committed to carrying on the tradition of excellence.

"We are very pleased and excited about the Texel acquisition and look forward to acquiring more corporate access helping to further distinguish us from our competition." says MCW Solutions Principal Michael Burnstein.

Accompanying the Texel purchase, MCW will be adding additional resources, certifications and sales focus on the telecommunications structure wiring line of business. MCW will be providing its clients with the highest level of structure wiring design / build capabilities in the industry.

MCW was founded in 2003 to meet the demand for a single integrator to provide turnkey systems in support of Telecommunications, Security and Audio/Video applications. MCW's methodology starts at the physical layer on the technology stack with structure wiring and moves through all phases, including the transportation and IT application layers, providing seamless Security/Access Control / CCTV, and Pro-A/V solutions.
